                                                                                                                                                                                                                                                                                                                               The invention comprises a nucleic acid molecule (DNA vaccine) that encodes a fusion polypeptide which is useful as a vaccine composition. The nucleic acid of the invention contains: a first nucleic acid encoding a polypeptide that promotes processing via the MHC class I pathway; a second sequence encoding a signal peptide; and a third sequence encoding an antigenic polypeptide. The DNA vaccine of the invention is useful for inducing or enhancing an antigen specific immune response, or to inhibit growth or prevent re-growth of a tumor expressing Human papillomavirus (HPV) E7 or E6 protein. The present amino acid sequence represents a human papillomavirus type 16 (HPV16) E7 protein of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New nucleic acid molecules encoding a fusion polypeptide comprising an antigen, a signal peptide, and a heat shock protein, useful as a vaccine for inducing or enhancing immune response or for inhibiting or preventing tumor growth.

Sequence 12, Application US/08860165A

Sequence 12, Application US/08860165A

Patent No. 6004557

GENERAL INFORMATION:
APPLICANT: EDWARDS, Stirling John
APPLICANT: EDWARDS, Stirling John
APPLICANT: FRAZER, Ian
APPLICANT: FRAZER, Ian
APPLICANT: FRAZER, Ian
CURRENT APPLICATION: VARIANTS OF HUMAN PAPILLOMA VIRUS ANTIGENS
FILE REFERENCE: 17227/130

CURRENT APPLICATION NUMBER: US/08/860,165A
CURRENT APPLICATION NUMBER: PCT/AU95/00868
EARLIER APPLICATION NUMBER: PCT/AU95/00868
EARLIER APPLICATION NUMBER: AU PN0157
EARLIER FILING DATE: 1995-12-20
EARLIER FILING DATE: 1994-12-20

LENGER OF SEG ID NOS: 15

SOFTWARE: Patentin Ver. 2.0

SEG ID NO 12

LENGER: 172

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Patent No. 6703491
GENERAL INFORMATION:
APPLICANT: Homburger et al.
APPLICANT: Homburger et al.
TITLE OF INVENTION: Nucleic acids and proteins of Drosophila melanogaster
FILE REFERENCE: File Reference: 7326-094
CURRENT EPLICATION NUMBER: US/09/270,767
CURRENT FILING DATE: 1999-03-17
NUMBER OF SEQ ID NOS: 62517
SOFTWARE: PatentIn Ver. 2.0
SEQ ID NO 41422
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CURRENT FILING DATE: 2000-08-15
